

Dear Tiere in Not Griechenland e.V. ,

We greet you from the Wildlife Rehabilitation Center of Greece “Action for Wildlife”!

Our rehabilitation center is based in Thessaloniki, taking caring of wildlife casualties from all over Northern, Central Greece and also from some islands for over 20 years now. We take in more than 2000 wild animals every year, with the goal to successfully release them in their natural habitats once they recuperate fully. The majority of our cases include bird species, but we also accept reptiles and some small and medium sized land mammals. There is constant supervision by an experienced scientific group of vets, biologists and other specialties.

The bulk of work is supported by volunteers, locals or from Europe that help with the daily feedings, cleanings , transportation of the animals (and other). Every single volunteer has dedicated a lot of time and strength into making it happen. Being an NGO, we cover the immense expenses of food, medicine and surgical procedures, facilities’ maintenance, cages’ construction mainly with the kind donations of the public that contributes financially or by donating directly the needed supplies to us.

We know of your huge contribution to improving the lives of stray dogs and cats in many regions by collaborating with some local groups that have also helped us greatly in our cause (Pet Friend Kavala has assisted us many times by rescuing on the spot and also bringing to us wild animals that were injured). This is the reason that we direct this request to you.

We would like to ask for your assistance to cover some of the needs of the animals we take care of, in terms of food and medicine. Below you can find a long list as we try to provide our animals with the best quality of nutrition and treatment in every stage of their recuperation:

MEDICAL SUPPLIES LIST

- Marbocyl inj. 2%
- Metacam inj 5 mg/ml
- Cazitel or Exitel 230/20 mg
- Effipro spray
- 0.5 ml and 1 ml syringes with detachable or non- detachable needle
- Leukosilk 1.25cm x4.6m and 2.5cm x4.6m
- Spray Bradex Biosilver or Pulvo 47

FOOD SUPPLIES LIST

- Kitten croquettes (dry food) **with no milk**, based on chicken (intended for mammals and birds)
- Dog croquettes (dry food) (intended for some mammals)
- Mealworms and Superworms (intended for our insectivorous animals)
- Hill's prescription diet a/d for dogs and cats or other brand with same features (intended for animals in critical condition)
- Calopet or Nutrivit energy paste for dogs and cats
- Wheat seeds (for our seed eater birds)
- Critical Care Herbivore (Oxbow)

A donation of any form that you might be capable of, be it financial (to buy the aforementioned supplies) or in-kind (by directly providing us with any of them), would make a great impact on our work for the protection of the biodiversity we are trying to achieve.

We would be pleased to answer any questions you may have about our work, you can contact us via mail in mail@drasi-agriazoi.gr,

and even take a small glimpse of what we do on our site <https://www.drasi-agriazoi.gr/index.php/en/>. Also, we are always open to give you a presentation about our work and discuss in live!

Warm regards,

Action for wildlife team
